TOUCH ELEVATOR CONTROL PANELS

## COMMANDER™ TOUCH-ENABLED ELEVATOR CONTROL PRODUCTS: EXPERIENCING TECHNOLOGY AT YOUR FINGERTIPS.

The interactive, modular, integrated and highly configurable elevator passenger management and information system from TL Jones. A system of signal-fixture hardware architecture based on highly configurable touch screen displays, TL Jones' COMMANDER™ Suite of elevator control products uses cutting edge technology to offer an enhanced journey

experience to elevator passengers. The COMMANDER™ Suite includes building information centres, car operating panels and landing call stations — all of which work alone or integrate together for a state of the art elevator management and information system.

## THE COMMANDER™ SUITE

A building incorporating COMMANDER™ products will realise increased elevator efficiencies for transit time, enhance the passenger experience, lower the effect of wear and tear and increase vandal resistance. The possibilities for topical information at a passenger's fingertips are endless, with an infinite variety of content for the 'captive audience'.

## BENEFITS

- Increased passenger management efficiencies
- User-friendly interface, aesthetically complementing other products and building environs
- Inform, entertain and inspire building patrons
- Use as an advertising platform
- Ease of installation

## FEATURES

- Latest touch screen technology
- Integrated: all products link together for a cohesive passenger management system both inside and outside elevators
- Fully programmable and customisable: limitless branding possibilities
- High quality graphics and interactivity
- Multimedia capable
- Vandal resistance

## BUILDING INFORMATION CENTRES

Welcome building visitors with the revolutionary new building information centre, COMMANDER™ PMIS. While creating an unbeatable first impression, the PMIS provides a state of the art interactive information platform for building patrons, relaying tenant and building layout information along with multimedia

advertising or up to the minute news at the touch of a finger. Use it either as a digital directory, or link it to a destination dispatch system for the ultimate in passenger management efficiency.

## ELEVATOR CAR OPERATING PANELS

COMMANDER™ Touch Car Operating Panels offer a stylish and innovative alternative to traditional mechanical push buttons. Combining the functionality of directing the elevator journey with a customisable touch interface that matches building decor, the COMMANDER™ T2 offers an easily

installed operating panel that can double as an information and entertainment platform. Also available is a volume standard fixtures model: the COMMANDER™ T1 has a static display and is ideal for low spec quantity installations.

## LANDING CALL STATIONS

As the perfect accessory, the COMMANDER™ LCS Landing Call Stations are a sleek addition to any building. As an alternative to mechanical push buttons, it offers building visitors a touch interface for calling elevators to their floor. The LCS is available

as either a fully customisable LCD interface (L2) that can include up to the minute news and messaging, or as a static volume standard model (L1).

# COMMANDER™

TOUCH ELEVATOR CONTROL PANELS

Be in full control of your elevator journey with TL Jones' COMMANDER™ touch elevator control products. Start from the lift lobby, where we get you the fastest way up with the intelligent passenger dispatch information system. Or step into an elevator to interact with our advanced touch-screen operating panel T2. Select your destination by simply touching the screen and off you go. You can also opt for our basic range of robust touch enabled solutions such as the T1 and the L1 series.

### Delight passengers with an unforgettable experience

COMMANDER™ utilises the latest touch technology ensuring dependable passenger input with voice and tone confirmation for further assurance. Our products are water-resistant and surfaces have undergone special treatment to withstand extreme usage and every day wear and tear. All is put in place to deliver an unsurpassed, intuitive experience.

### Customised Screen Content Design

Special, customised graphic designs for those who want something really unique. Tailor the visuals to your preferred style or theme. Enhance with the infinite possibilities of multimedia. Let the specialists in our team give you personal and professional advice while they interpret your needs.

### Efficiency

Elevator traffic management is integral to the COMMANDER™ system with options ranging from passenger recognition to security, in addition to destination dispatch system interfacing.

### Hassle-free installation and maintenance

The products have been designed for true plug-and-play capability, supplemented by user-friendly configuration software and remote content management to individually addressable components. The absence of moving parts eliminates many of the problems of wear and tear in-service.

### Systems to satisfy the needs of all users

A number of features and options are incorporated to address the most demanding of code requirements including elegant solutions that exceed disability standards.
